CARR-291
MASON-DIXON LINE: MILESTONE NO. 55(58)
Lineboro, Maryland/Pennsylvania vicinity
Public/private

1766 (reset 1902; reset at new location on the Line 1983)

Milestone No. 55(58), an original crownstone of 1766, approximately marks Mason and Dixon's 55th horizontal mile west of the northeast corner of Maryland, the beginning point of their 230.228-mile West Line, longest of their survey lines run and marked during their 1763-68 commission to define the boundary between the English provinces of Maryland and Pennsylvania. This crownstone, as with all original West Line monuments, was an embellished oolitic limestone post with a low pyramidal top, quarried and carved in England, and originally measured about 12" square by about 4/2' long, cut to stand about 3' above ground. Straddling the Line, the shield of the Penn coat of arms faced Pennsylvania to the north, and that of the Calverts faced Maryland to the south. Reset in 1902 to stand about 1/2' above ground, during the course of the 1900-03 Resurvey of the Maryland-Pennsylvania boundary, No. 55(58) was buried at the time of the reworking and elevating of this section of Carroll Warehime Road (believed in the mid-1960's). In 1983, through the coopertive effort by the states of Maryland and Pennsylvania and the National Geodetic Survey, the monument was excavated and reset at a new site about 20' west on the Line. It now stands about 14" above ground, measures about 11" square, is in fairly good condition though with large chips at the top corners (one into the Calvert shield), and remains unaltered. It has recently been enclosed by an iron cage provided by the Col. Richard McCalister Chapter of the DAR. On the federal and state levels, this crownstone is significant primarily as one of a series of 135 original Mason and Dixon monuments still standing along the West Line, the boundary commonly known since Civil War times as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. Locally, as one of 18 original monuments remaining along the present Carroll/York county boundary (3 crownstones; 15 milestones), it is also significant as one of a diminishing number of objects and structures with a visually identifiable relationship to the colonial and Civil War heritage of these two counties.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

Until April 4th, 1983, / Milestone No. 55(58) marked Mason and Dixon's 55th horizontal mile west of the initial stone at the northeast corner of Laryland, the beginning point of their 230.228-mile West Line. It is an original crownstone of 1766, one of 24 remaining along the entire Line; one of only 3 remaining along the present Carroll/York County boundary; is in fairly good condition and now stands firmly about 14" above ground and and visibly in place/about 20' west of its original site, at a newly surveyed point on the Line.

The area here is rural, gently rolling, with/scattered farms/ batches of woodlands/ and recent subdivision development to the east and scuth. The original/sites are located about 1 mile due east of the village of Lineboro, ND/PA, at the northwest corner formed by the junction of Carroll Marchime Road (T-352). The original site (recorded by NGS prior to the relocating of the monument) was about 3' from the edge of the road junction, was a depression encircled by a bent metal oil drum, with the monument unexposed, covered by several inches of soil, about 2 below ground level, and otherwise unmarked. The new site is on slightly higher/ground, cleared, and monitored by neighboring residents. The relocation took place following considerable cooperation among the agencies (Haryland Geological Survey and the Division of Land Records) and resurveying (National Geodetic Survey); and the actual moving/provided by /Pennsylvania (Tork County Maintenance Department), without any damage to the stone.

The monument, as with all original Mason and Dixon monuments along their West Line, was quarried and carved in England; was an embellished, oolitic limestone post with a low pyramidal top, measuring about 12" square by about 4/21 long (the bottom 1/21 rough-cut for setting into the ground). In 1902, during the course of the 1900-03 Resurvey of the Maryland-Pennsylvania boundary, this crownstone was reset to stand about $1/2^{\bullet}$ above ground and the remainder surrounded by a collar of concrete below ground. It remained this visible and above road grade level until sometime after the 1950 field inspection of the Maryland-Pennsylvania boundary markers (believed by some until about mid-1960's, when Pennsylvania road maintenance workers regraded/reworked Carroll-Warehime Road and buried the monument, marking with the metal oil drum). It now measures about 11" square (west side, 11/2") and stands about 14" above ground. The Penn shield, facing north, is clear and intact, though there are large chips at the top corners and edges; the Calvert shield/is clear but damaged (large chunk out of the top southeast corner and edges). Most fluting and bits of margins remain, as do some of the/planes, though all edges are chipped. According to the Hanover, PA, Evening Sun (undated article), the Jol. Richard McCalister Chapter, DAR, recently enclosed this monument with a "wrought iron case on their own initiative, without contacting the agencies responsible, CONTINUE ON SEPARATE SHEET IF NECESSARY apparently). (see Thematic Group Lational Register nomination form for descriptions of original Mason and Dixon Monuments and 1900-03 Resurvey method of resetting)

STATEMENT OF SIGNIFICANCE

/Milestone No. 55(58), a crownstone, is significant on the federal and state levels as one of the 135 original Mason and Dixon monuments of 1766 and 1767 still standing along their 230.228-mile West Line, the boundary commonly known since Civil Mar times as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. Marking the 55th mile west of the northeast corner of Maryland, this crownstone is one of only 24 remaining on the entire/Line, and one of 18 (only 3 of which are crownstones) remaining on the present Carroll/York county boundary, and thus of considerable local significance, as a visual representation of the colonial and Civil Mar heritage of these two counties.

Border

Moving rock and history

By CRISTINA ROUVALIS

Daily Record staff writer

LINEBORO, Md. — At a bend of rural road, history was moved a little Monday on the line that once divided Yankees from Rebels.

A camera-happy crowd watched as road crews relocated one of the limestone crownstones of the Mason-Dixon line.

At 12:30 p.m, the rock was still in a hole in the ground by the roadside. That's hardly the place for 2½ tons of history that helped to settle border squirmishes between Pennsylvania and Maryland in the 1760s and separated free state from slave states during the Civil War.

By late afternoon, the rock had a n home on a grassy patch abo e ground on the border of Carroll Township, Md. and Manheim Township, Pa. The new site is 20 feet west.

Now people can look at the eroded Pennsylvania Coat-of-Arms on one side of the marker, the Maryland one on the other, instead of stumbling into a ditch, said Frank Brown, who lives on the neighboring farm.

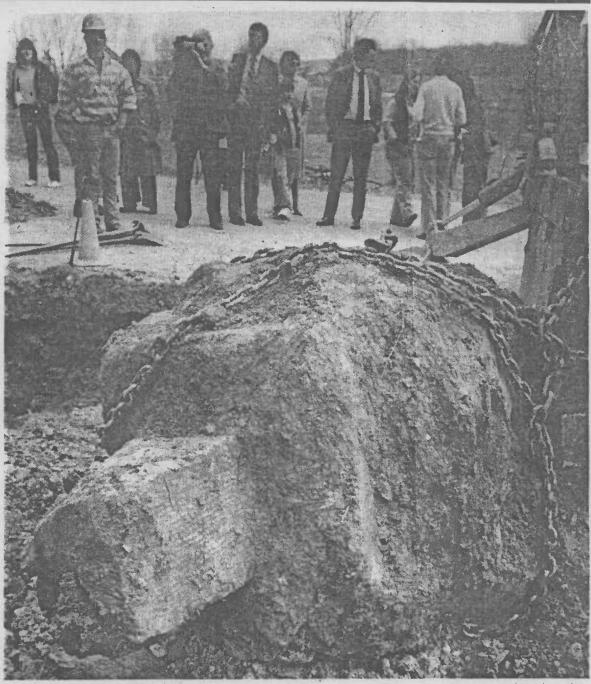

No; the crownstones hadn't sunk three feet, Brown said. The road was elevated in the early 60s, and the crownstone stayed below. A metal drum had protected it from the elements.

"Someone once drove around the curve and into the ditch," said Brown, the catalyst for the relocation. "Fortunately the crownstones and the person were ok."

So in the interest of safety and history, Brown decided to organize a group to move the legal boundary between the two states.

That plan was scrapped, he said, when the Pennsylvania Historical and eum Commission told him pecan't just pick up cornerstones and move them.

Such a task requires computer calculations and celestial observations to make sure the stone stays on the line. The commission, the Maryland Geological Survey and

Onlookers gaze as Mason-Dixon crownstone is unearthed

Record photo by Marilyn Shapiro

the National Geodetic Survey undertook the project.

The Pennsylvania Department of Transportation donated a road crew to the cause. The lifting of the crownstone after two hours of digging was punctuated by cheers.

It was the first time that a cornerstone on the Pennylvania-Maryland border had been moved, said J.M. Anderson, of the Maryland Department of Transportation.

The marker was even intact.

To Barbara Lefever, the project recalled a courageous trek through the wilderness by English surveyors Charles Mason and Jeremiah Dixon from 1763 until 1767. Mrs.

Lefever wrote a book about the duo that she hopes to get published.

"Mason was the serious, soberminded one," she said. "Dixon was the flippant, happy-go-lucky one. He was the mathematical genius."

The surveyors were commissioned from England to draw a boundary that would finally settle the fierce boundary battles between Pennsylvania and Marlyland farmers. A crew of more than 40 blazed the wilderness' trail before the crownstone were set five miles apart.

Although the surveyors names later were immortalized as the Civ-

il War line of demarcation, she said, they died unsung heroes in Colonial times.

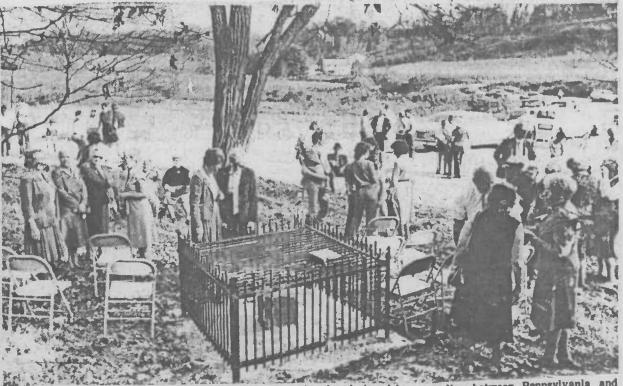

"That's why I wrote the book," Mrs. Lefever said.

To Carol Knobloch, the relocation meant she inherited a small block of history on her property.

She doubts whether the relocated crownstone will become a tourist attraction on the secluded stretch of rural road where strangers are a rare sight.

"But it would be nice if some people took an interest in it," said Knobloch, of Crossroads Schoolhouse Road. "I plan to put a flower garden around it and dress it up a little."

MASON EDIXON'S WEST LINE: MILESTONE NO. 55 (58) original Cours fore

MASON-DIXON MARKER, DEDICATED - The Col. Richard Mc Calister Chapter, Daughters of the American Revolution, dedicated a Mason-Dixon crown marker along Baughman Mill Road in Manheim Township Sunday afternoon. The marker, which was excavated about a

year ago, was restored and placed inside a wrought iron enclosure for protection. Rep. Donald Dorr, (R-193rd) assisted in the program to formerly dedicate the stone. The crown markers were placed along a line surveyed by C. Mason and J. Dixon between 1763 and 1767. This line formed the south bound-

ary, line between Pennsylvania and Maryland. Prior to the Civil War, the Mason-Dixon Line separated the free states from the slave states and now it is regarded as separating the North from the South. (Evening Sun Photo by Jim Caler)

PHOTOGRAPHS MARKER -Madeline Fleming, York, photographs the ceremonies to dedicate a crown marker along the Mason and Dixon Line in Manheim Township Sunday. Mrs. Fleming has hiked 76 miles of the boundary line between Maryland and

Pennsylvania - from its origin to Adams County. This fete was accomplished over a 30 year period. The marker, restored and protected, was dedicated by the Coi. Richard McCalister Chapter of the DAR. (Evening Sun Photo)

Moving up in the world

A crownstone of the Mason-Dixon Line in Manheim Township was relocated from its spot three feet under the ground to a new location Monday afternoon. Ed Adams of Hanover gives the thumbs up sign to the backhoe operator, Dennis Rhodes, to keep pulling the marker from the ground.
